

OMNI FOOD

We are a technology company first, but with a major focus on consumer well-being through a healthy diet. Most people are very busy with their jobs, family and friends, and other important activities, which doesn't leave much time for cooking. This might lead to a poor diet and lasting health consequences. We want to solve this problem by using an AI-centric approach.

MORE THAN 30 KINDS OF FLAVORS

Soup is a primarily liquid food, generally served warm or hot (but may be cool or cold), that is made by combining ingredients of meat or vegetables with stock, milk, or water. Hot soups are additionally characterized by boiling solid ingredients in liquids in a pot until the flavors are extracted, forming a broth. Soups are similar to stews, and in some cases there may not be a clear distinction between the two; however, soups generally have more liquid (broth) than stews.[1].
